

# SOUP N' SCIENCE

## VISITING SCIENTISTS: UNIVERSITY OF TEXAS EL PASO

UIC Science is excited to introduce a team researchers from the University of Texas El Paso (UTEP) who have spent years collecting geospatial and remote sensing data, and making this data available to the public through BAID (Barrow Area Information Database). Please come eat some homemade soup and learn how to utilize the BAID online resources! We have lots of researchers in town so come and mingle!

Let's have some homemade soup and learn about:

- BAID (*Barrow Area Information Database*)

-Online applications at [BarrowMapped.ORG](http://BarrowMapped.ORG) to support research and community planning;

-New techniques to measure coastal erosion;

-Examples of applications: Coastal Erosion Viewer; Community Planning Tool; Research Sites Viewer; and Imagery Time Viewer.

**Time:** Friday, July 7

**Place:** BARC Large

**Conference room** (Barrow Arctic Research Center is located on the NARL campus).
