

# SOUP N' SCIENCE

## VISITING RESEARCHERS:

## NORWAY-CANADA-USA COLLABORATION: INTPART ARCTIC FIELD SCHOOL

UIC Science is very excited to introduce a large team of researchers to Utqiaġvik from across the Arctic. The field school is an international collaboration and brings together dozens of students and instructors from Norway (UiT - Arctic University of Norway Tromsø), the University of Alaska Fairbanks (UAF), and the University of Calgary, Canada (UC). Please come and eat homemade reindeer soup and help UIC Science welcome our visitors!

Let's have some  
homemade soup and  
listen to team members  
share their research!

The field school attempts  
to teach students:

-To respect and work with  
Arctic residents and other  
Arctic scientists;

-How remote sensing  
measures and monitors  
changes in climate, sea ice,  
and the terrestrial/  
atmospheric Arctic  
environment;

-To recognize knowledge  
gaps, research methods,  
advanced technologies and  
data analysis requirements,  
and to ask questions and  
perform research that is  
beneficial to society.

**Time:** Tuesday, June 5<sup>th</sup> 2018

12:00-1:30 pm

**Place:** BARC Large

Conference room (Barrow  
Arctic Research Center is  
located on the NARL  
campus).

Please contact UICS if you have  
any questions and comments.
